### CAREER OBJECTIVE

An ambitious BCA student with a strong proficiency in Web development, Java programming, SQL, and Data structures & algorithms. Experienced in crafting robust and scalable web solutions while utilizing frameworks like Visual Studio and .NET. Passionate about leveraging technology to drive efficiency and solve real-world problems. Seeking opportunities to apply my diverse skill set, collaborate with multidisciplinary teams, and contribute to cutting-edge projects in the realm of computer applications.

### PROJECTS

#### M-Mart

2024

Windows Application

M-Mart is a comprehensive point-of-sale (POS) and inventory management system designed to streamline retail operations with efficiency and accuracy. With M-Mart, businesses can seamlessly manage sales transactions, track inventory levels in real-time, and optimize stock replenishment processes. The system empowers retailers to enhance customer service by providing quick and accurate checkouts while ensuring inventory accuracy and minimizing stock outs. M-Mart's intuitive interface and robust features make it an essential tool for businesses looking to drive profitability and enhance customer satisfaction in the dynamic retail.

Languages used: Vb.Net (Windows Forms), PHP, Photoshop, MySql (Database)

#### FoodO'Poils

2024

Web Application

FoodO'Poils is a web platform facilitating food donation, linking surplus food donors with individuals in need, streamlining food redistribution to combat hunger efficiently. Through the platform, donors can offer excess food, and recipients can access donations seamlessly, fostering an effective process of food redistribution.

Languages used: PHP, HTML, CSS, JS, Photoshop, MySql (Database)
